Re: Training Program Recertification FY 21-22 (#120)

Dear Jennifer Young:

In accordance with Texas Government Code Section 2054.519, the Texas Department of Information Resources (DIR) reviewed the cybersecurity training program listed below in a previous year and determined that it meets the required criteria. Because the program has had no material changes to the content that render it ineligible under the mandatory criteria, and because it adequately addresses the new criterion, it is hereby recertified for use by state and local government employees. The certification is valid from September 1, 2021 through August 31, 2022. To retain certification after this date, the training program will need to reapply for certification.

Training Program Provider: Dynamic Computing Services Corporation
Training Program Name: Cyber Security Awareness Program 2021
Expiration Date for Certification: August 31, 2022

Attached is a logo that can be used as evidence of certification. The logo may be used in promoting the training program to customers, provided: (i) the logo may is not modified in any way, (ii) when displayed, the size of the logo is equal to or smaller than the training program provider's logo, (iii) the logo is used only to communicate the certification status of the training program to customers. No other use of the logo is authorized unless prior written permission is obtained from DIR.

Please note that this certification is for the program's educational content and does not alter any other regulatory or statutory obligations.

Please direct any questions to TxTrainingCert@dir.texas.gov.

Sincerely,

Nancy Rainosek
